

FlightTurf®

A PRODUCT OF
Native Return®

SAVE \$800
or more
per acre
annually*

Why pay to mow over 20 times a year when you can mow once... and keep wildlife away!

FlightTurf® is a patent pending live turfgrass
technology revolutionizing airfield management.

Safer Airports

- Lower wildlife strike risk
- Animals hazardous to aircraft, such as geese and deer, dislike FlightTurf® and tend to graze elsewhere
- Reduce operational risk and increase security by greatly reducing mowing events

Reduced Costs

- Only one mow per year to maintain an average 7" height
- Minimize runway interruptions
- No fertilization or watering
- Improved resistance to insects, turf disease, and weeds
- Lower equipment and wildlife management costs

Environmental Benefits

- Reduce emissions from mowing
- Decrease stormwater runoff
- Eliminate watering – drought tolerant
- Protect wildlife
- Improve public image

FlightTurf® performs well in the cool season and transition zones shown on the map, however results depend on specific site conditions.
